Next Js.

AKBAR DERMAWAN

FULL-STACK WEB DEVELOPER

PROFILE

I am a website developer with an educational background in Agricultural Engineering. I graduated from one of the universities in Indonesia in 2020. Although my career path slightly deviates from my academic background, I chose to focus on improving my skills in programming, specifically in web development. I decided to pursue a career as a website developer because of my interest in programming, animation, and design. Additionally, I enjoy working with computers more than doing other types of work. I gained my skills through self-learning via online tutorials and also through an intensive three-month training program at one of the well-known training institutions.

EDUCATION

Jember University (2016-2020)
S1 Teknik Pertanian – IPK 3,43

In the even semester of 2020, I was entrusted with the role of Teaching Assistant for the Post-Harvest Technology course, where I contributed to supporting the teaching process and assisting with student practical activities.

RELEVANT WORK EXPERIENCE

Freelance., Full-stack
MAR 2024 – Present
- Developed website components using modern frameworks
- Participated in code reviews with development teams
